

## Smart Designer X3.2007.09 Release Notes:

### Major enhancements and additions in Smart Designer X3, version 2007.09 for CorelDRAW X3

#### Compatibility and Performance

- Overall increase in performance and reduction in the use of system resources.
- Added compatibility with all versions of Windows Vista.
- Optimized user interface for all versions of Windows Vista.
- Added compatibility with Internet Explorer 7 and Windows Media Player 11 in Windows Vista and XP.
- Optimized software for 64 Bit operating systems including Windows XP 64 bit and Windows Vista 64 bit versions.
- Added compatibility with CorelDRAW X3 Service Pack 2 (version 739).
- Added compatibility with the Smart Template Editor plug-in for CorelDRAW.

#### CD Copier and Virtual Drive Manager

- Burn CDs and DVDs from ISO files.
- Backup and restore templates.
- Add custom volume labels for virtual drives.

#### Smart Templates and Layouts Tab

- Enhanced user interface in Smart Templates feature enabling live font changes, sampling of colors for text colors changes and easier text entry.
- Ability to select a size when choosing a Smart Template.
- Ability to adjust the page size when editing a Smart Template.
- Improved the functionality of creating and saving custom Smart Templates.
- Improved performance in Clip Art Book Maker.

#### Sizing and Arranging Tab

- Additional sizes and size categories to the Size to Product feature.
- Additional page formatting options.
- **New Reset Text on Path Feature:**
  - Reset text on a path if it becomes detached.

#### Art Preparation Tab

- **New Swap Document Colors Feature:**
  - Display colors in a document and make global changes to colors without selecting objects.
  - Ability to create and display a custom color palette from colors used in a document.
  - Change colors within a document and preserve tints.
  - Choose from a pop-up window interface or docker.

#### Selection Tab

- **New Pick Color from Screen or Bitmap Feature:**
  - Pick colors from the screen or a bitmap and apply colors to the fill or outline colors of a selected object.
- Several new selection options including select and extract Power Clips.

#### Other Improvements

- Corrected issue that prevented the Favorites Docker from opening.
- Improved loading time of text effects.
- Realigned Effects Toolbar tabs to match layout in the menu bar and command center.
- Added an option to convert outlines to objects when using the Split Front feature.
- Optimized Swap Document colors to allow preservation of tints or not and all shades now show in the color palette reflecting the tint value.
- Improved performance of the Reduce Colors and Consolidate Blacks features.
- Corrected issue in Halftone Wizard and added the ability to apply halftones to outline or fill objects.
- Added ability to combine circles into a solid vector object in Circle Text feature.
